

RECOVERING PROGRAM

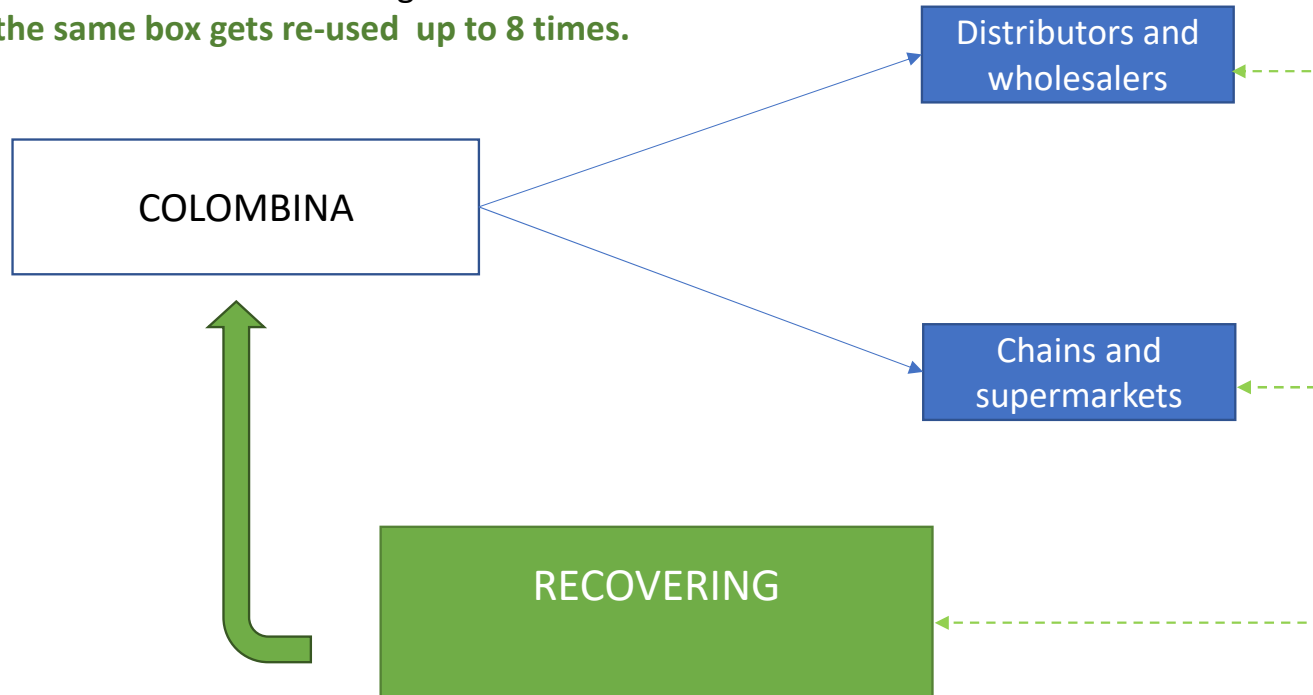

¿How does the program work? Product Flow

This program consists of the reuse of product boxes that leave our plants and distribution centers and go out to clients.

On average, the same box gets re-used up to 8 times.

- ✓ Recovering buys the boxes from distributors, wholesalers, chains and supermarkets to be taken to their facilities in Cali and recovered.
- ✓ Recovering delivers the boxes to the factory in the same conditions as a new box.

BENEFITS AND RESULTS

ENVIRONMENTAL BENEFITS

Based on the reuse of 1 ton of cardboard (+/- 3,000 boxes), for every 3,000 reused boxes that we avoid:

The consumption of:

11.680 m3 of water

7.600 kws of energy

The feeling of 17 trees

The generation of 1500 lbs of greenhouse gases.

➤ **Since the program began we have achieved:**

- Recover more than 5 million corrugated boxes
- Prevent the felling of approximately 34,000 trees

➤ **In 2023:**

- Reuse approximately 250,000 corrugated boxes.
- Prevent the felling of approximately 1,400 trees.
- Avoid the generation of 57 tons of CO2 in the year.
